

2011-10-01

To whom it may concern

**Confirmation**

**European Directive: 2011/65/EU**

***Elix™***

We confirm that:

Compounds of cadmium, lead, mercury and hexavalent chromium, as well as the flame retardants PBB and PBDE (pentabromodiphenylether, octabromodiphenylether and decabromodiphenylether) have not been intentionally added for the production of thermoplastics of the above mentioned product lines with exception of technically unavoidable traces far below the tolerated maximum concentration values.

Therefore, thermoplastics resins **Elix™** comply with the requirements stated on Annex II of **EU Directive 2011/65/EU** of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment ("**RoHS-Recast Directive**").

**EU Directive 2002/96/EC** on waste electrical and electronic equipment ("WEEE-Directive") is regulating the recovery and disposal of waste electrical and electronics equipment. Therefore, the compliance with this directive has to be confirmed by the manufacturer of the final parts.
